

Groups on Russia Progress Report

Rafael Campos-Gottardo & Alan Nemirovski

2026-02-18

Comments from meeting: Feb. 12, 2026

- Pro-Russia/Pro-Ukraine dichotomy in the long-run as opposed to doing the more granular “Russia appeaser” (only using dichotomous question around trade/security, i.e., Q73) → appeaser group is conceptually too small over time
- “Other” group is too big
- Appeasers: also more broad appeasers (potentially on a more general note) → sticking with smaller appeasers group for short
- Additional data sources: European Social Survey, European Values Survey (same as World Values Survey), Eurobarometer survey (look at those for additional Russia-related Q’s?)
- Calling people that selected “Neither” or “Don’t Know” as “Un-knowledgeable” (more broadly)

Long-term (simplified) measure

Long-term measure centered on dichotomous question for trade with Russia (Pro-Russia) or defence against Russia (Pro-Ukraine); all outstanding respondents tentatively classed as “Other”.

```
EUI_data <- EUI_data %>%
  mutate(ukrainegroups_long = case_when(Q73 == "European countries should invest more in trade and dipl
    Q73 == "European countries should invest more in defence and se
      TRUE ~ "Other"))

table(EUI_data$ukrainegroups_long)
```

```
##
##      Other  Pro-Russia Pro-Ukraine
##      53948      51603      57573
```

Short-term (simplified) measure

```
EUI_data <- EUI_data %>%
  mutate(ukrainegroups_short = case_when(
    Q73 == "European countries should invest more in defence and security to defend against Russian agg
    New_Q78_4 %in% c(3, 4) ~ "Pro-Russia",
    New_Q78_5 %in% c(3, 4) ~ "Pro-Russia",
    TRUE ~ "Other"
  ),
  Q73_dk = as.integer(Q73 == "Neither/DK"), #Neither/DK coded as 1
  # coding people who answered 2/3 questions as "Dont Know" into "Unknowledgeable"
  ukrainegroups_short = ifelse(Q73_dk == 1 & New_Q78_4 == 5,
    "Unknowledgeable", ukrainegroups_short),
  ukrainegroups_short = ifelse(Q73_dk == 1 & New_Q78_5 == 5,
```

```

                                "Unknowledgeable", ukrainegroups_short),
    ukrainegroups_short = ifelse(New_Q78_4 == 5 & New_Q78_5 == 5,
                                "Unknowledgeable", ukrainegroups_short))

table(EUI_data$ukrainegroups_short)

```

```

##
##          Other      Pro-Russia      Pro-Ukraine Unknowledgeable
##          19019      9965          26881          17620

```

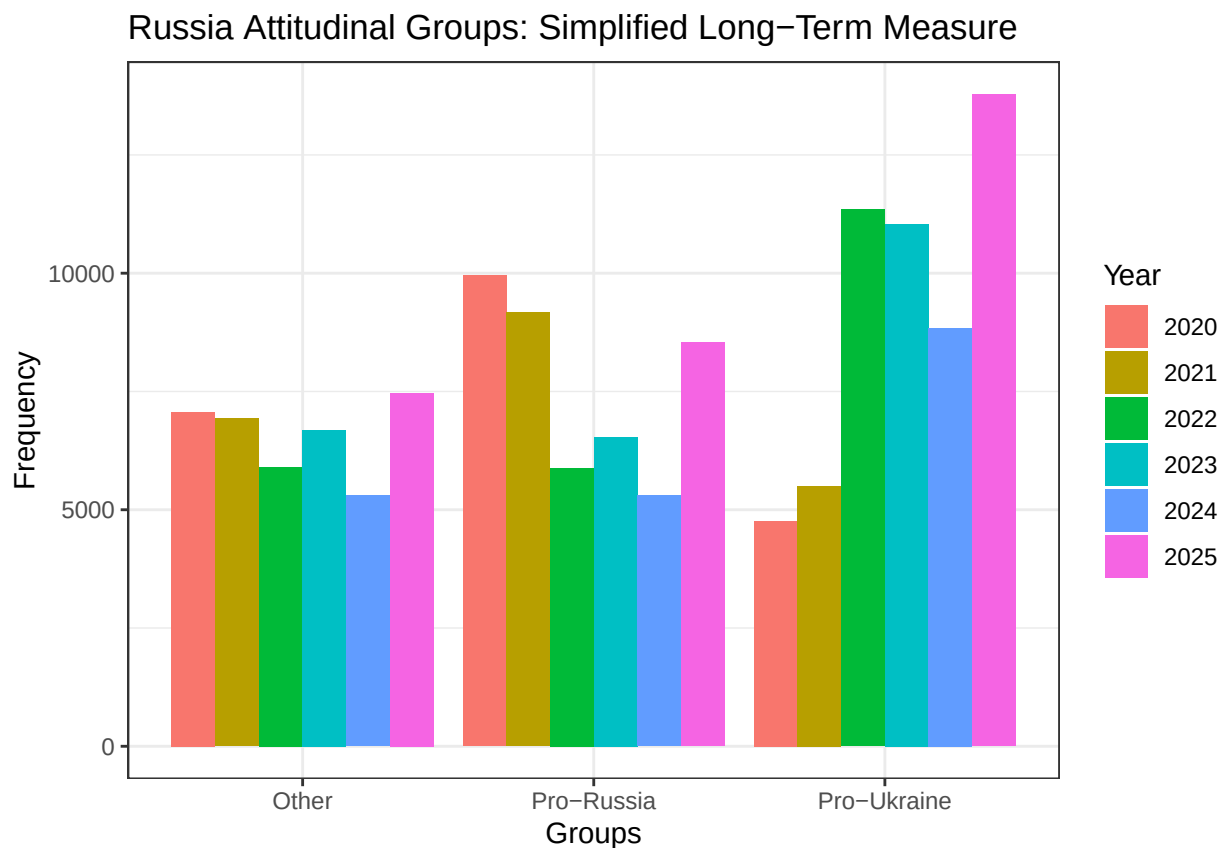

Proportion trends over time

New long-term measure

```

#Frequencies
EUI_data %>%
  filter(Year > 2019) %>%
  ggplot(aes(x = ukrainegroups_long, fill = as.factor(Year), group = as.factor(Year))) +
  geom_bar(position = "dodge") +
  labs(fill = "Year", title = "Russia Attitudinal Groups: Simplified Long-Term Measure",
       x = "Groups", y = "Frequency") +
  theme_bw()

```

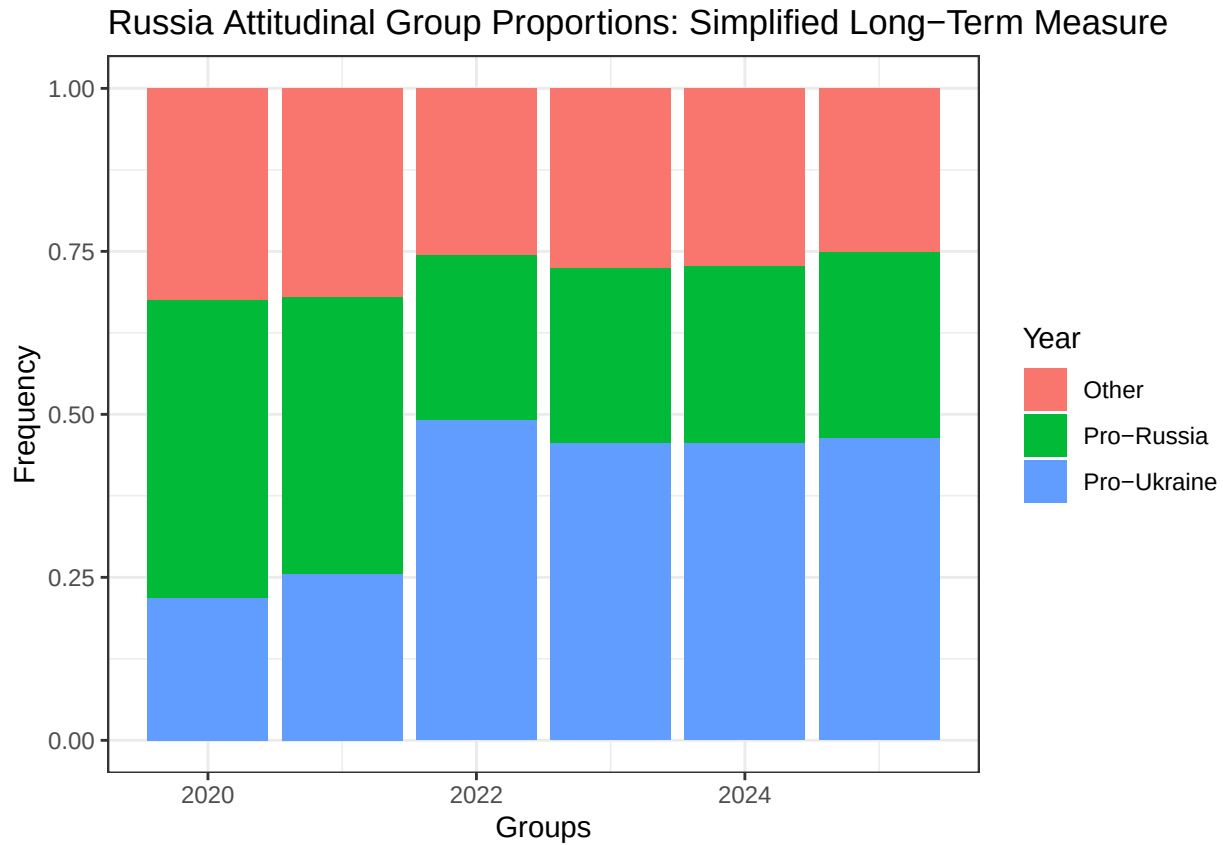

```

#Proportions
EUI_data %>%
  filter(Year > 2019) %>%

```

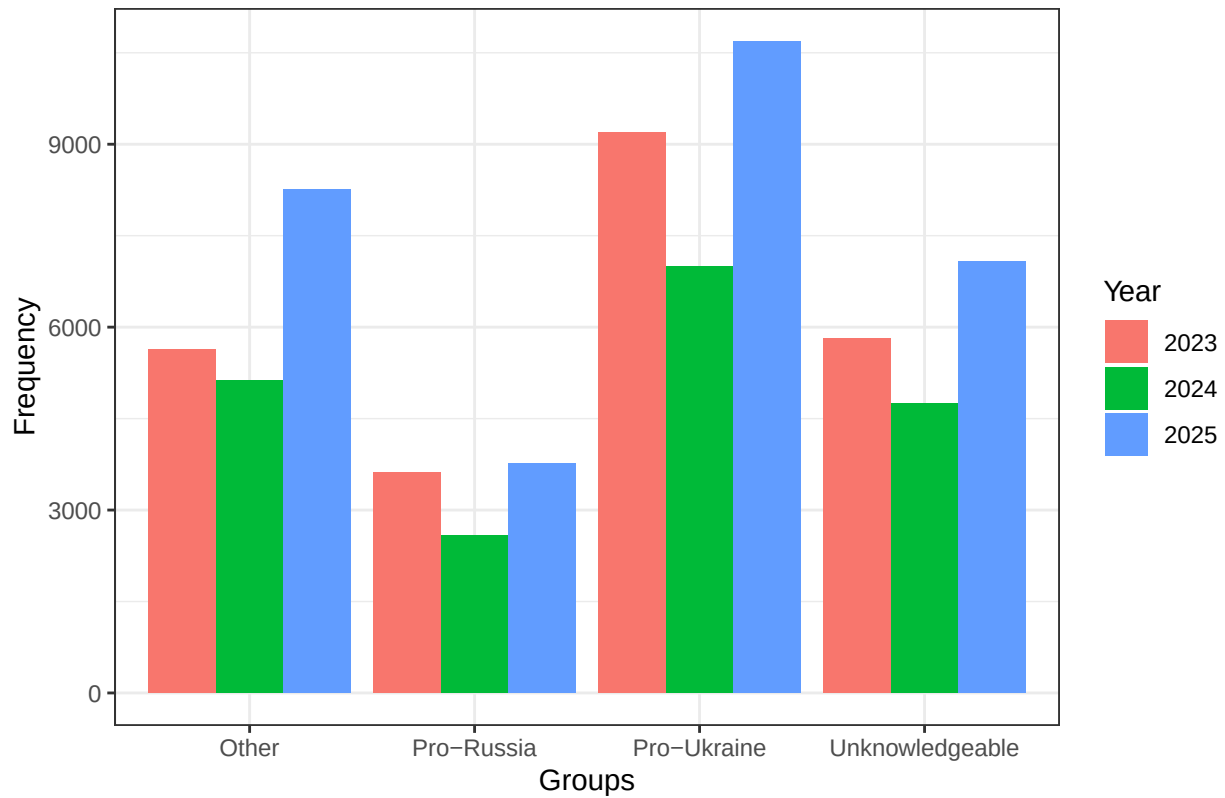

```
ggplot(aes(x = Year, fill = as.factor(ukraine_groups_long))) +
  geom_bar(position = "fill") +
  labs(fill = "Year", title = "Russia Attitudinal Group Proportions: Simplified Long-Term Measure",
        x = "Groups", y = "Frequency") +
  theme_bw()
```

New short-term measure

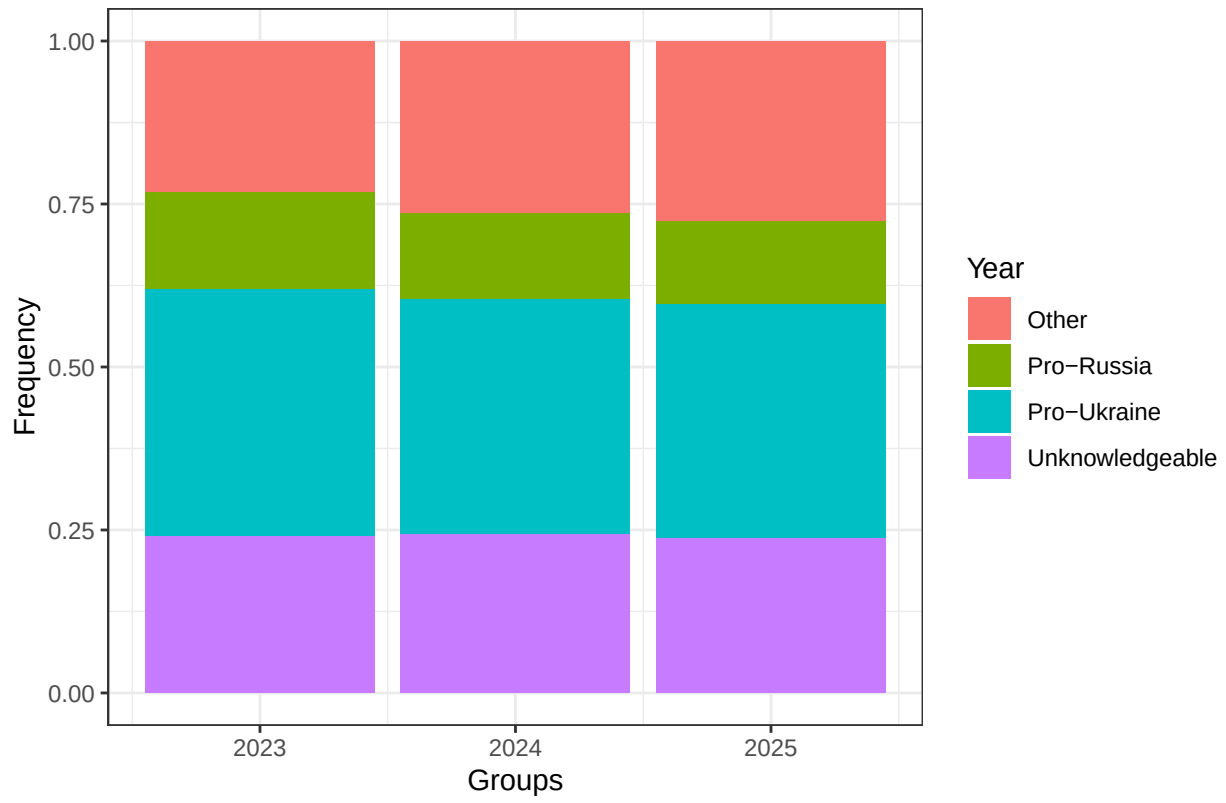

```
#Frequencies
EUI_data %>%
  filter(Year > 2022) %>%
  ggplot(aes(x = ukraine_groups_short, fill = as.factor(Year), group = as.factor(Year))) +
  geom_bar(position = "dodge") +
  labs(fill = "Year", title = "Russia Attitudinal Groups: Simplified Short-Term Measure",
        x = "Groups", y = "Frequency") +
  theme_bw()
```

Russia Attitudinal Groups: Simplified Short-Term Measure

```
#Proportions
EUI_data %>%
  filter(Year > 2022) %>%
  ggplot(aes(x = Year, fill = as.factor(ukrainegroups_short))) +
  geom_bar(position = "fill") + #for frequency, change position to "dodge"
  labs(fill = "Year", title = "Russia Attitudinal Group Proportions: Simplified Short-Term Measure",
        x = "Groups", y = "Frequency") +
  theme_bw()
```
